boffin ('bɒfin). *slang.* [Etym. unknown. Numerous conjectures have been made about the origin of the word but all lack foundation.]

1. An 'elderly' naval officer.

1941 C. GRAVES *Life Line* 143 Their ages are as youthful as air crews. Thirty-two is considered the maximum... In H.M.S. *Wasps' Nest*, anyone aged thirty-two is officially a 'boffin'. He had been in the Bank of England for many years, and in the R.N.R. almost as long... I hadn't been to sea in a professional capacity for some eighteen years.

2. A person engaged in 'back-room' scientific or technical research. Hence **'boffin(e)ry**, boffins collectively; also, the activity of a boffin.

The term seems to have been first applied by members of the Royal Air Force to scientists working on radar.

It certainly has something to do with an obsolete type of aircraft called the Baffin, something to do with that odd bird, the Puffin; I am sure it has nothing at all to do with that first literary Back Room Boy, the claustrophiliac Colonel Boffin. **1958** *Times Lit. bogey ('bəʊgɪ). *Golf.* Also bogy, bogie. [The following story reproduces the current account of the origin of the term:——

One popular song at least has left its permanent effect on the game of golf. That song is 'The Bogey Man'. In 1890 Dr. Thos. Browne, R.N., the hon. secretary of the Great Yarmouth Club, was playing against a Major Wellman, the match being against the 'ground score', which was the name given to the scratch value of each hole. The system of playing against the 'ground score' was new to Major Wellman, and he exclaimed, thinking of the song of the moment, that his mysterious and well-nigh invincible opponent was a regular 'bogey-man'. The name 'caught on' at Great Yarmouth, and to-day 'Bogey' is one of the most feared opponents on all the courses that acknowledge him (1908 *M.A.P.* 25 July 78/1).]

bogle ('bəʊg(ə)l). Forms: 5–6 bogil(l, 7 bogell, 8– bogle; 7–9 *north. Eng.* boggle. [Of the various names *bogle*, *boggard*, *bogy*, applied to a goblin, *bogle* is the earliest known, being common in Scottish literature since 1500. In the present century its use by Burns, Scott, Hogg, and others has introduced it into English literature; but the special English form seems to be *boggle* (with short *o* as in BOGGARD), found in north. Eng. dialects from Cumberland to Lincolnshire. The derivation of the whole group is uncertain: the primitive may be *bogge*, BOG *sb.*[2], and this may be a variant of *bugge*, BUG; which is not improbably a. Welsh *bwg* (= bug) ghost, bugbear, hobgoblin. The form of *bogle*, *boggle*, would still remain unexplained: it is perhaps worth while to compare Welsh *bwgwl* (= 'bugul) 'terror, terrifying' (whence *bygylu* (bʌ'gʌly) to terrify), and *bygel* (or *bugail*) *nos* a hobgoblin of the night: see BUG. But there are also German words of similar form and meaning, *bögge* and *boggel-mann* 'a bogy, a bogle': so that uncertainty attaches to the source. Cf. BOGGARD.]

bogus ('bəʊgəs), (*sb.*[1]) *a.* [A cant word of U.S., about the origin of which many guesses have been made, and 'bogus' derivations circumstantially given.

Dr. S. Willard, of Chicago, in a letter to the editor of this Dictionary, quotes from the *Painesville* (*Ohio*) *Telegraph* of July 6 and Nov. 2, 1827, the word *bogus* as a sb. applied to an apparatus for coining false money. Mr. Eber D. Howe, who was then editor of that paper, describes in his *Autobiography* (1878) the discovery of such a piece of mechanism in the hands of a gang of coiners at Painesville, in May 1827; it was a mysterious-looking object, and some one in the crowd styled it a 'bogus', a designation adopted in the succeeding numbers of the paper. Dr. Willard considers this to have been short for *tantrabogus*, a word familiar to him from his childhood, and which in his father's time was commonly applied in Vermont to any ill-looking object; he points out that *tantarabobs* is given in Halliwell as a Devonshire word for the devil. BOGUS seems thus to be related to BOGY[1], etc.]

bogy[1], **bogey** ('bəʊgɪ). Also boguey, bogie. Pl. bogies. [Found in literature only recently; old people vouched (1887) for its use in the nursery as early as 1825, but only as proper name (sense 1). Possibly a southern nursery form of *bogle*, *boggle*, and *boggard*, or going back like them to a simpler form which, as mentioned under BOG and BOGLE, may be a variant of *bugge*, BUG 'terror, bugbear, scarecrow'. But in the absence of evidence, positive statements concerning its

relation to these words cannot be made. (That they are connected with the Slavonic *bog* 'god', is a mere fancy from the similarity of form, without any evidence.)]

Certainly not connected with *bost*, BOAST (as has been suggested on the ground of the 16th c. Sc. spelling *boist* for *bōst*). The phonology and form suggest French origin, and in form the ME. word exactly answers to OF. *boisteus*, AF. *boistous*, mod.F. *boiteux* lame; but no connexion of sense appears to be traceable, at least if the etymology proposed by Diez for the French word from *boiste* 'box', 'knee-joint' holds good. The essential meaning in Eng. from the first appears to have been 'coarse, rough', but senses 1–4 are all nearly equally early. The later variants *boisteous*, *boystuous*, led to the modern BOISTEROUS.

The Welsh *bwyst* 'wildness' appears to be a figment of Owen Pugh, but *bwystus* 'wild,

ferocious' occurs in the 14th c., and may be a deriv. of an obs. **bwyst*:—L. *bēstia*; or it may be merely the ME. *buystous*.)]

bond (bɒnd), *sb.*[2] and *a.* Forms: 3-6 bonde, (5 bounde, 6 band(e, bund), 3- bond. [Early ME. *bonde*:—OE. *bonda, bunda* husbandman, householder, husband, a. ON. *bónde*(*-i*), contr. of *bóande, búande* 'occupier and tiller of the soil, peasant, husbandman; husband', ppl. sb. from *búa, bóa* to dwell, L. *colĕre*, and thus equivalent in sense and etymology to Ger. *bauer*. In Iceland the *bónde* was a peasant proprietor 'including all owners of land from the petty freeholder to the franklin. In the more despotic Norway and Denmark, *bóndi* became a word of contempt, denoting the common low people; and in mod.Da. *bönder* means *plebs*. In the Icelandic Commonwealth the word has a good sense, and is often used of the foremost men.. this notion of the word (a franklin) still prevails in the mind of Icelanders' (Vigf.). In OE., *bonda, bunda* appears first in the Laws of Cnut, apparently in the same sense as in ON., and nearly, if not entirely, = OE. *ceorl*. When, through the effects of the Norman Conquest, the *ceorl* sank from the position of a free-man tilling his own land to that of a tenant bound to certain services to a lord (see Freeman *Norm. Conq.* V. 477), *bonde* became equivalent to 'villain', and so at length to 'serf, slave' (sense 3), and was thenceforth evidently associated with BOND *sb.*[1] and BOUND. The ON., OHG., MHG., and Du., have, beside the general sense 'bone', the specific sense 'shank (of the leg)', which is the ordinary sense in mod.Ger. Hence it has been suggested that the original meaning was 'long bone'; and that the word may have connexion with the ON. adj. *bein-*, nom. masc. *beinn*, 'straight'. But this is a bare conjecture; the standing of the ON. adj. being itself obscure. In English there has never been any tendency to the specific sense, for which OE. had *sceanca* SHANK.]

bonny ('bɒnɪ; see below), *a.* Forms: 6 bony(e, 8 -ie, 6- bonny, bonnie. [Of uncertain origin: presumably to be referred in some way to OF. *bon*, *bone* 'good', or its ME. naturalized form *bon*, *bone*, *boone* (see BOON *a.*); but no satisfactory

account of the formation can be offered. In Sc. the pronunciation is often *bōnie* ('boni, 'bo:ni), in Border Counties even ('buni).

A notable coincidence in form and sense is presented by the Sp. *bonito* 'pretty, bonny', dim. of *bueno* 'good'; but there is no corresponding form in OF. to which ME. *bonie* might be referred. And analogy does not much favour the possibility of a derivative form from ME. *bon, bone*, good.]

book (bʊk), *sb.* Forms: 1 bóc, booc, 2–4 boc, 3–5 bok, 4–6 boke, 4–7 booke, 4– book; (also 4–6 bock, 7 boock; *north.* 4 buk, 4–8 buke, *Sc.* 6–8 buick, 6– buik). Pl. books; in 1 bóec, béc. [A com. Teut. word, differing however in gender and other points in the various langs. With OE. *bóc* monosyllabic fem. (pl. *béc*) cf. OFris. and OS. *bôk* (pl. *bôk*) fem. and neut. (MDu. *boek* neut. and often masc., Du. *boek* masc.), OHG. *buoh* (pl. *buoh*) neut., also masc. and fem. (MHG. *buoch*, mod.G. *buch* neut.), ON. *bók* (pl. *bœkr*) fem. (Sw. *bok*, Da. *bog*), all in sense of 'written document, book'. These forms indicate an OTeut. **bôk-s* str. fem., the plural of which was

in OHG. and elsewhere sometimes made neuter (after the analogy of neuter monosyllabic plurals), and this gender extended to the sing. The original meaning was evidently 'writing-tablet, leaf, or sheet': cf. Venantius Fortunatus *Carm.* vii. 18, 19 'barbara fraxineis pingatur runa tabellis', also OS. *thia bôk* the writing-tablet, '*pugillaris*' Luke i. 63 (in *Heliand* 232, 235), OE. *bóc* charter: in pl. tablets, written sheets, hence 'book,' a sense subseq. extended to the singular. Gothic does not show **bôks*, but an apparently derivative form *bôka* str. fem., in sense of 'letter' of the alphabet, pl. *bôkôs litteræ*, *γράμματα*, writing, document, book.

Generally thought to be etymologically connected with the name of the beech-tree, OE. *bóc, béce*, ON. *bók*:—(see BEECH), the suggestion being that inscriptions were first made on beechen tablets, or cut in the bark of beechtrees; but there are great difficulties in reconciling the early forms of the two words, seeing that *bôk-s* 'writing-tablet' is the most primitive of all.]

3. *gen.* A written or printed treatise or series of treatises, occupying several sheets of paper or other substance fastened together so as to compose a material whole.

In this wide sense, referring to all ages and countries, a *book* comprehends a treatise written on any material (skin, parchment, papyrus, paper, cotton, silk, palm leaves, bark, tablets of wood, ivory, slate, metal, etc.), put together in any portable form, e.g. that of a long roll, or of separate leaves, hinged, strung, stitched, or pasted together.

a. *spec.* (In reference to modern things.) Such a treatise occupying numerous sheets or leaves fastened together at one edge called the *back*, so as to be opened at any particular place, the whole being protected by binding or covers of some kind. But, since either the form of the book or its subject may be mainly or exclusively the object of attention, this passes on either side into

b. The material article so made up, without regard to the nature of its contents, even though its pages are occupied otherwise than with writing or printing, or are entirely blank (cf. 10): e.g. 'a handsome book', i.e. a trophy of the binder's art, 'a tiny book,' one that may be put in the waistcoat pocket.

c. A literary composition such as would occupy one or more volumes, without regard to the material form or forms in which it actually exists; 'an intellectual composition, in prose or verse, at least of sufficient extent to make one volume' (Littré s.v. *livre*). In this sense Carlyle described himself as 'a writer of books'.

It is not now usual to call a (modern) literary composition in manuscript a 'book', unless we think of its printing as a thing to follow in due course. In sense b every volume is a 'book'; whilst in sense c one 'book' may occupy several volumes; and on the other hand one large volume may contain several 'books,' i.e. literary works originally published as distinct books. No absolute definition of a 'book' in this sense can be given: in general, a short literary composition (especially if ephemeral in character, and therefore also in form) receives some other name, as *tract, pamphlet, sketch, essay*, etc.

boom (bu:m), *sb.*[3] orig. *U.S.* [This and its verb (BOOM *v.*[3]) have arisen recently in U.S.: it is not clear whether the vb. is from the sb., or conversely. The actual origin is also a matter of conjecture; probably, it consisted in a particular application of BOOM *sb.*[1] and its vb., with reference not so much to the sound, as to the suddenness and rush, with which it is accompanied. Cf. esp. BOOM *v.*[1] 1 c., and 2. But association, original or subsequent, with other senses of BOOM, is also possible, and the actual use of the word has not been regulated by any distinct etymological feeling, so that no derivation will account for all its applications.]

Collins (Judge Advocate of the colony when founded in 1788) collected a short vocabulary of Port Jackson words, in which *wo-mur-rāng* occurs among 'names of clubs'. (He has also *wo-mer-ra* the throwing stick, which some later writers erroneously identify with the boomerang.) In a short vocabulary of the extinct language of George's River, Botany Bay, printed by Ridley, *Kámilaróí* 103, are *womrā* 'throwing stick for spear', *būmarin* 'boomerang'. *Boomerang* was given as 'the Port Jackson term' by Capt. King in 1827; its exact relation to *wo-mur-rāng* and *būmarin*, and the relations of these to each other can perhaps not now be determined. A very graphic account of the use of the weapon (described as 'a bent, edged waddy resembling slightly a Turkish scimitar') is in the *Sydney Gazette* of 23 Dec. 1804: the name *boomerang* has not been found in that paper up to 1823.]

boor (bʊə(r)). Forms: (5 boueer), 6–7 boore, bour, (7 bore, boar), 7– boor (9 bauer). [A word of involved history in and out of English, though the ultimate etymology is clear enough. The 16th c. *bour*, *boore*, may possibly have been native Eng., repr. an earlier **búr*, short for OE. *ȝebúr* 'dweller, husbandman, farmer, countryman' (Bosw.), a deriv. of *búr* 'dwelling, house, cottage, BOWER', f. the verb root, *bū̆* to dwell: cf. the compound *neighbour*:—ME. *neȝebur*:—OE. *néahȝebúr* 'nigh-dweller', also modern East Anglian BOR 'neighbour' as a form of address. But on the whole, in its literary use, the word is more likely to have been adopted from LG. *bûr*, Du. *boer*: see the quots. under

sense 2, and BOER. These words are themselves etymological equivalents (or nearly so) of OE. *ġebúr*; the OHG. form being *gibûr*, *gibûro*, MHG. *gebûr*, *gebûre*, MLG. *gebûr*, and *bûr* (occurring 1365), mod.LG. *buur* (made *bauer* in mod.HG.), MDu. *ghebure*, *ghebuer*, and *buer*; also (late) *geboer*, which was not properly a Du. form, but probably, according to Cosijn, adopted from Frisian, or, according to Franck, from the LG. on the eastern frontier of the Netherlands. This last is in mod.Du. *boer*. The original sense of WGer. *gibûr*, *gibûro*, was 'inmate of a *bûr* or BOWER, fellow-occupier of a dwelling, farm, or village; neighbour, mate'. Partly from being preserved mainly in rural use, but largely from association with the vb. *bûan* (MHG., MDu. *bûwen*, Ger. *bauen*, Du. *bouwen*) to inhabit, cultivate, till (of which, as we have seen, it was not a derivative, though a cognate word from same root *bŭ-*), its original connexion with *bûr*, BOWER, was lost, and the sense more and more confined to that of 'peasant, rustic', and thence 'clown'.

While mod.Ger. has merged the word in form with *bauer*, agent-noun from *bauen* 'to cultivate, to build', mod.Du., on the contrary, makes a distinction in use between the native *buur* (MDu. *ghebure*, *ghebuer*) 'neighbour', and the adopted *boer* (MDu. *geboer*) 'peasant, husbandman, farmer, clown, knave at cards', and keeps both distinct from *bouwer* 'tiller, builder' (though in MDu. the latter was used in senses subsequently taken up by *geboer*, *boer*.]

booty ('bu:tɪ), *sb.* Forms: 5–6 botye, buty, 6 boty, bootye, bootie, (7 *Sc.* bouty), 6– booty. [The mod. as well as the early forms, point to a ME. long *ō*, and thus to connexion with *bōt*, BOOT *sb.*[1] advantage, and *v.*[1] to profit. But there is no accounting for such a formation from *bōt*, *boot* directly; and it is generally held that the English word is due to an adaptation of some word cognate with Ger. *beute*, F. *butin* (or the latter itself) influenced in form by association with *bōt*, *boot*. The Teutonic words in question are ON.

býti 'exchange, barter', connected with *býta* 'to exchange'; also 'to deal out, distribute'; MDu. and MLG. *büte* (MG. *bûte*, MHG. *biute*, mod.G. *beute*, mod.Du. *buit*), all with the sense 'booty'. *Butin*, from French, was used side by side with *boty*, *booty* during the 16th c., and it is curious that the first known instances of both occur in Caxton's *Chesse*, within a few lines of each other: see BUTIN. Caxton has also *buty* (see 1491), and in 17th c. we find an instance of *bootyn* for *butin*: but on the whole the contact of the two forms appears to be slight. The shorter form BOOT (*sb.*[2]), and the related BOOT *v.*[2] BOOTER (*freebooter*), BOOTING, are all later.

(An early but dubiously genuine use appears under BOOTY *a.*, which, if really used by Lydgate *c* 1430, would carry the question farther back, but leave it still more obscure.)]

bore (bɔɔ(r)), *sb.*[2] [This, and its vb. BORE[2] arose after 1750; etymology unknown.

(Usually supposed to be f. BORE *v.*[2], which is then regarded as a fig. use of BORE *v.*[1], with the notion of 'persistent annoyance' (cf. Ger. *drillen*). But it seems impossible in this way to account for sense 1 of the sb., which is apparently the source of the other senses, and of the verb itself. If related at all to BORE *v.*[1] or *sb.*[1], the connexion must be much more indirect; possibly there is an allusion to some now forgotten anecdote. The phrase 'French bore' naturally suggests that the word is of French origin; *bourre* padding, hence (in 18th c.) triviality, *bourrer* to stuff, to satiate, might be thought of; but without assuming some intermediate link these words do not quite yield the required sense.)]

†**1.** The malady of *ennui*, supposed to be specifically 'French', as 'the spleen' was supposed to be English; a fit of ennui or sulks; a dull time.

3. *Hist.* (usually with obs. spelling.) A *friðborh* (lit. 'pledge of peace') or tithing, which in early England was an association of ten neighbouring householders who were jointly answerable before the law, 'so that if one of the ten men offend, the other nine may bring him to right'; afterwards called *liberum plegium* and FRANKPLEDGE, the word *friþ* 'peace' having been corrupted into 'free'. There is no direct evidence that in OE. *borh* was used as = *friðborh*, but in 16th c. *borowe* appears as a synonym of 'tithing' or 'frankpledge', and from that period to the present time many writers have confused it with BOROUGH. borrow ('bɒrəʊ), *v.*[1] Forms: 1 borȝian, 3 boru, 3–5 borwe, 4–5 borou, borewe, 4–6 borowe, (5 boro(o, bourowe, bor(o)wyn, borwon, borwne), 5–6 borow, (6 burow), 7 borrowe, 4- borrow. [OE. *borȝian*, f. *borȝ*, *borh* pledge, surety (BORROW *sb.*); cf. OHG. *borgên* to take heed, f. **borg* (?object of care), MHG., mod.G. *borgen* to borrow, f. MHG. *borg* pledge.]

I. To give security for, take on pledge.

1. *trans.* **a.** To take (a thing) on pledge or security given for its safe return; **b.** To take (a thing) on credit, on the understanding of returning it, or giving an equivalent; *hence*, to obtain or take the temporary use of (a thing recognized as being the property of another, to whom it is returnable). Const. *of*, rarely *from*, formerly *at*.

The essential notion of borrowing originally was the *security* given for the safety of the thing so taken: the essential notion now is that the thing is the property of another and liable to be *returned*, the only security given being often the undertaking, formal or implied, that it shall be so returned when we have used it.

2. *fig.* a. To render oneself indebted for; to make temporary use of (something not one's own); used, e.g. of temporal possessions, with notion of their being only *lent* to us, not given. More usually of immaterial things: as, to adopt (thoughts, expressions, modes of conduct) from another person, or (words, idioms, customs, etc.) from a foreign language or people; to obtain (a temporary favour) by request; to derive (one's authority, etc.) from another, as opposed to holding it by inherent right; to draw (a comparison, inference, suggestion) from some source alien to the subject in hand; to adopt (something) for other than its normal purpose. Const. *from*, *of*, formerly *at*.

As applied to the adoption of foreign words or customs, it properly implies that the adoption is merely temporary; but this restriction is now often disregarded, esp. by writers on philology; cf. LOAN-WORD.

1894 T. ELLISTON *Organs & Tuning* 63 Borrowing from one stop to form part of another is undesirable; the wind coming sometimes from one source, and at other times from another, or from both sources, make it impossible for the note to be always in tune... botch (bɒtʃ), *v.*[1] Also 4 bocchyn, 5–6 botche. [ME. *bocche-n*, of uncertain etymology: having apparently no original relation to BOTCH *sb.*[1], though the words may have subsequently influenced each other. Prof. Skeat suggests for the vb. a LG. origin, comparing MDu. *butsen*, (1) to strike, beat, (2) to repair (Oudemans), app. related to Du. *botsen* to knock, dash, Ger. dial. *butschen*, *butzen* to strike, knock; according to Franck an onomatopœic word of echoic origin. But the sense 'repair' in Du. *butsen* seems to be recent, while in English it appears in Wyclif: also there is no sense 'knock' in English, so that connexion with the continental words is very doubtful. Perhaps the Eng. word is an onomatopœia related in its genesis to 'patch'; cf. Ger. *batzen* to patch. See BODGE.]

[early ME. *bāðe* (genitive *bāðre*) was app. a. ON. *báðar* m., *báðir* fem., *bæði, báði* neut. (genitive *báðra*) = OS. *bêðia* m. f., *bêðiu* neut., OHG. *bêde* and *beide* m., *bêdâ, beido* fem., *bēdiu, beidiu* neut.; an extended form of the simple word found in Goth. as *bai* masc., *ba* neut., and in OE. as *bégen, bá* (see BO). No trace of this extended form appears in OE.; the simpler form *bei*, BO existed side by side with *both* until 14-15th c., when the former dicd out.

The suffix in ON. *báðar* and the equivalent forms is believed to be unconnected with that in Goth. *bajôþs* both (declined as sb. plur.), and to represent the definite article (in Goth. *þai, þô*) which seems to have coalesced with the simple *bai, ba* owing to the tendency to say 'both the' instead of merely 'both'; cf. Goth. *ba þô skipa* 'both the ships' *Luke* v. 8. The constructions of *both* in Eng. follow those of the earlier BO and to some extent those of ALL; examples of its use as attribute to a sb. plur. without intervening possessive, demonstrative, or article, do not appear until after BO had become obsolete.]

A. *adj.* **I.** Proper sense and normal uses.

The one and the other; referring to two specially designated persons or things, implying that two and no more are so designated, and emphasizing the fact that neither of them is excepted from the statement made; equivalent to 'the two, and not merely one of them'.

The following Constructions occur:

1. *absolutely.* From 14th c. sometimes *the both* (obs.). In early mod.Eng. sometimes inflected as a sb., with genitive *both's.*

Eng.* II. 113 Both were Tories: both were men of hot temper and strong prejudices.

2. In *apposition* with a plural sb. or pronoun.

When referring to the subject of a sentence, *both* was in early ME. usually separated from it, and placed after the vb. or whole predication. This is still common dialectally. In the literary language, *both* is still placed after the verb *be* (occasionally also after *become, seem, appear*, etc.), and after the auxiliary in a compound tense.

3. In *attributive* relation to a plural sb.:

a. with a defining word (demonst. or poss. adj., 'def. article', genitive case, etc.): *Both* precedes the defining word, as 'both my friends saw it'. It may also (with greater emphasis) follow the sb., esp. when the subject of the sentence, as 'my friends both saw it'. (In this case it further follows the verb *be* or an auxiliary, as' my friends had both seen it': cf. 2).

The constructions are the same when there is ellipsis of the sb. after demonst. or poss. pron., as 'I need both these', 'these are both mine'. For the colloq. *both of* before sb. see 6.

c. without defining word. *Both* regularly precedes the sb., but in lively or humorous address may sometimes follow it, as in quot. 1597. *both ways*: in both respects.

4. In *attrib.* relation to a plural pronoun:

a. in nom. or obj. *Both* follows the pronoun, as 'they both went'. (With *be* and auxiliaries it further follows the verb: cf. 2). In ME. *both* might precede the pronoun, 'both they went'; of this usage *both which* still occurs; but the regular modern construction with *both* preceding the pronoun is 'both of us', 'both of whom', 'both of which' (see 6).

Latterly the sb. often improperly took the plural form by attraction of the pronoun; this idiom is still in vulgar use, as 'It is both your faults,' 'she is both their mothers'.

5. In *attrib.* relation to two substantives or pronouns (or a sb. and pron.) coupled by *and*, the same constructions obtain as in 3: as 'both John and I came', 'John and George both came', 'the brother and sister are both dead', but this is practically indistinguishable from the adverbial use in B 1.

6. With *of*: *both of* is now used before pronouns and pronominal words, instead of the simple *both* (see 4). The use with a sb., as 'both of these arguments', is colloquial, but scarcely ever occurs in literature.

1721 R. KEITH *T. à Kempis' Vall. Lillies* ii. 22 Both is a very great Evil.

B. *adv.* (*conj.*)

1. Preceding two homogeneous words (sbs., adjs., vbs., advbs., or preps.) or phrases, coupled by *and*, *both* adds emphasis to the sentence by suggesting a contrast with the statement as it would have been had one of the terms been omitted. *both . . and* is thus nearly = *not only . . but*. (*Both* in this construction is not now preceded by a genitive case or an adj. of any kind, as in quots. 1641, 1690, 1834).

As *both . . and* corresponds to the Latin *et . . et*, it is usual to class *both* as a conjunction; but it more properly belongs to the same grammatical category with EVEN. This use of *both* arises out of the construction in A 5, and in 'both the king and the queen spoke', 'the king and the queen both honour him', 'Mercury and Venus are both inferior planets', *both* may still be viewed as an adjective in attributive relation to the two substantives. But in the extended use 'both juster and kinder' or 'both by day and by night', 'he both walks and runs', it can no longer be so treated.

botham, -em, obs. form of BOTTOM *sb.*

bother ('bɒðə(r)), *v. colloq.* Also 8 bodder, *Sc.* bauther, bather. [Etymology unknown; the earliest instances occur in the writings of Irishmen (T. Sheridan, Swift, Sterne), and the word has long formed part of the vocabulary of the comic Irishman of fiction and the stage. This suggests an Anglo-Irish origin; but no suitable etymon has been found in Irish.

The Irish *bódhar* deaf, *bódhairim* I deafen (suggested by Crofton Croker), and *buaidhirt* trouble, affliction, *buaidhrim* I vex (proposed by Garnett) alike labour under the difficulty that the spoken words do not suggest *bodder* or *bother*. Wedgwood would identify the word with *pother*: could *bother* be an Anglo-Irish corruption of the latter?]

boulder-stone ('bəʊldəstəʊn). Forms: 3–6 bulder-ston(e, 7 boother-, bowther-stone, 8–9 bowlder-stone, 7– boulder-stone. [Etymology obscure. With ME. *bulderston*, cf. Sw. dial. (E. Gothl.) *bullersten* a large stone in a stream, one which makes a rumbling noise in the water, as opposed to *klappersten* a smaller pebble; f. Sw. *buller* noise, roar, *bullr-a* to roar, rumble + *sten* = STONE. This gives a passable sense; but no corresponding word is known elsewhere in Swedish, Old or New, Icelandic, Norwegian, or Danish; so that actual relation between the North. Eng. and Swedish dialect word cannot be asserted.

No words answering to Sw. *buller, bullra*, exist in Old or New Icelandic; but Da. has *bulder* 'tumbling noise', *buldre* 'to racket, rattle, make a noise'. If either these words were in use in North. Eng., or a compound **bulder-steen* in Da., it would be natural to find here the origin of the Eng. word; but no such connecting links are found. The verb and sb. seem indeed to exist in the Sc. *buller* 'to bellow, roar', *buller* 'bellowing, roar, loud gurgling sound', but this is not quite the shade of sense required, while the form it would yield is not *bulder-, bowlder-, bowther-*, or *boother-*, as actually found in North. Eng. dial., but **bullerstane*, which is not found.]

bounce (baʊns), *v.* Forms: 3 bunsen, 4–7 bounse, 6–7 bownce, 6– bounce. [The origin of BOUNCE *v.*, *sb.*¹, *int.* (*adv.*) is obscure, and their mutual relations complicated. ME. *bunsen* agrees in form and meaning with mod.Du. *bons* a thump, *bonzen* (LG. *bunsen*, HG. dial. *bumbsen*) to beat, thump, thwack; but there is no early record of these words, and perh. they may be related to the Eng. word merely as parallel onomatopœic formations. Early in 16th c. we find the interjectional use of *bounce* (= LG. and HG. dial. *bums!*) to imitate the report of a gun or other loud sudden noise, and (a little later) to express sudden or violent movement. About the same time the vb. (previously seldom occurring) became common in its original sense 'to beat', but with the notion of noise or vehemence more conspicuous—'to knock, bang'; it also acquired the senses 'to make a banging or explosive noise', and 'to make a sudden or violent movement of a bounding nature'. The sb. is also found in all these senses early in the 16th c. Whether these were natural developments of the original sense, as expressing phenomena which often accompany a knock or thump, or at least are present in the bang of cannon (which had come into use just before these extensions of *bounce*), or whether there has been influence of any other words is not clear. The development of sense however is to a great extent parallel to that of BANG, which has dialectally even the sense of '*bounce* into a room', etc.]

bow (bau), *sb.*[3] *Naut.* Also 7 bowe, 8 bough. [Recorded only since 1600. Corresp. in form and sense to LG. *bûg*, Du. *boeg*, Da. *boug*, *bov*, Sw. *bog*, all with senses 'shoulder of man or beast', and 'bow of a ship'. The older Teut. forms were ON. *bóg-r*, OHG. *buog* (MHG. *buoc*), MDu. *boech* 'shoulder of man or beast', OE. *bóg*, *bóh* 'shoulder, upper arm', and 'bough of a tree':—OTeut. **bôgu-z.* corresp. to Gr. *πᾶχυς*, *πῆχυς*, and Skr. *bâhu-s* 'arm'. *Bow* is thus in origin the same word as BOUGH, but while the latter has come down direct from OE. in one of the OE. senses, *bow* has been adopted at a later time from LG., Du., or Da., in the special sense of the 'shoulders' of a boat or ship, developed in the maritime speech of one or other of these, but not known to OE. or ME. *Bough* and *bow* have thus widely diverged, the earlier meaning of 'shoulder, arm', not being retained by either. (Not related to BOW *sb.*[1], nor to BOW *v.*[1], though probably now associated with the latter in the popular etymological consciousness, as appears from most attempts to explain it.)]

The normal modern spelling would be BOLL which came down to 17th c. in sense of 'round vessel', and is still used in sense of 'round seed-vessel'; but the early ME. pronunciation of *-ōll* as *-ōwl* (cf. *roll, poll, toll*, etc.), has left its effects in the modern spelling *bowl* in the sense of 'vessel', which is thus at once separated in form from other senses of its own (see BOLL *sb.*[1]), and confounded with BOWL *sb.*[2] a ball, from Fr. *boule*.]
1. a. 'A [round] vessel to hold liquids, rather wide than deep; distinguished from a cup, which is rather deep than wide.' J. Usually hemispherical or nearly so.
Historically, a *bowl* is distinguished from a *basin* by its more hemispherical shape; a 'basin' being proportionally shallower and wider, or with the margin curved outward, as in the ordinary wash-hand basin; but the actual use of the words is capricious, and varies from place to place; in particular, the ordinary small earthenware vessels, used for porridge, soup, milk, sugar, etc., which are historically *bowls*, and are so called in Scotland and in U.S., are always called in the south-east of England, and hence, usually in literary English, *basins*. The earlier usage remains in *salad-bowl, finger-bowl* (now also *basin*), *punch-bowl*, and the *convivial* or *social bowl* (see b).

bowl (bəʊl, baʊl), *sb.*[2] Forms: 5-7 boul(e, bowle, (7 bowel), 7- bowl; *Sc.* and *north. dial.* boul, bool. [ME. *boule*, a. F. *boule* ball:—L. *bulla* 'bubble', hence, 'round thing, ball'. The French pronunciation (bul), is retained in Sc. and parts of Northumbria, now often written *bool*; the normal English would be (baʊl) as in *foul, fowl*, which still prevails in nearly all the dialects from Yorkshire to Devon, and thence to Kent; the pronunciation (bəʊl), a corruption due to graphic confusion with BOWL *sb.*[1], appears to have originated in London and its neighbourhood, but has extended elsewhere with the use of the vb. in cricket.]

[Found in all the mod. Teut. langs.: Du. *boegspriet*, LG. *bogspret*, Ger. *bug-*, *bogspriet* (from LG. or Du.), Sw. *bogspröt*, Da. *bogspryd*; in all connected with the ship's BOW, and with a word, in OE. *spréot* pole (ME. *spret*, *spreet*), Du. *spriet* spear, javelin, Sw. *spröt* insect's feeler. Cf. also OHG. *spriuzan*, MHG. *spriuzen* to prop. The origin seems to lie between LG., Du., and English: in the latter *spréot* was itself used in a nautical sense in OE. and ME. (see SPRIT). But against the compound *bow-sprit* being of English rise, are the late appearance of *bow* in the language, and the numerous perverted forms with *bore*, *boar*, *bolt*, *bold*, *bole*, *bowle*, which seem to show that the connexion with *bow* was not evident to English sailors, either in sense or pronunciation. OSlav. root *bol-* great; but Miklosich would connect it with Turkish *boj* stature, *boijlu* high; Dahl, and others, with Russ. *boi* 'war', which may have influenced the later form. The word occurs in Byzantine Greek as *βοϊλάδαι*, *βολιάδαι*; Bulg. *bolerin*, Serv. *bolyar*, Rouman. *boiér*.]

A member of a peculiar order of the old Russian aristocracy, next in rank to a *knyaz* or 'prince', who enjoyed many exclusive privileges, and held all the highest military and civil offices: the order was abolished by Peter the Great, and the word is in Russia only a historical term, though still often erroneously applied by English newspaper writers to Russian landed proprietors. In Roumania the *boiér* still existed (*c* 1887) as a privileged class. (The Eng. *boyar* appears to have been taken from the plural; *boyard* is an erroneous French spelling.)

bracket ('brækɪt), *sb.* Also 6–7 bragget, 7 braget(t, 8 brecate, brockett. [The earliest form *bragget* appears to be (either directly or through F. *braguette*) ad. Sp. *bragueta*, dim. of *braga*:—L. *brāca*, sing. of *brācæ* breeches; the form *bracket* is a corruption, perh. influenced by It. *bracheta*, dim. of *braca*:—L. *brāca*.

The Eng. senses are difficult to account for, but may in part be based on unrecorded senses of the Sp., It., or Fr. words. Prof. Skeat suggests that the 'bracket' of architecture may have been so called from its resemblance to the 'codpiece' of a pair of breeches (Sp. *bragueta* meant both 'codpiece' and 'bracket'). Further, a name suggested by 'breeches' may naturally have been applied to an apparatus consisting of two limbs set at an angle, like the 'bracket' of shipbuilding, or to appliances used in pairs, like the 'brackets' of a gun-carriage. Then, as a bracket of any kind was generally used for support, the erroneous etymology from L. *brachium* 'arm' or its Romance derivatives presented itself, and seems to have affected the development of senses. Cf. also OF. *bracon* and *braquant* 'supporting beam'.]

Sometimes improperly applied to the 'vinculum' or horizontal line over the writing, serving in algebra the same purpose as brackets; also to the 'brace' { used for coupling together two lines of writing or printing (cf. BRACKET *v.*); hence *brackets* is used *fig.* for 'the position of being bracketed equal, equality'.
